

Teaching Definition Essay

Schools are one of the first places where kids' behavior and future educational success is shaped. Teachers are carriers of either positive or negative behavior toward students. The reason why the first years of school are so critical is because kids learn the base of their educational life. I believe that teachers must love their career in order for them to pass enthusiasm, to assist, and to provide a warm environment to the students. In my opinion teachers are the second mothers for the students because students spend a lot of time with their teachers. At the same time, I believe a real teacher becomes through many years of training and experiences in the field. The same way, mothers are not born being great mothers but as their experiences with their kids expand they become experts on the field. We know that mothers look the best for their kids and one of their goals is to raise their kids so they can become professional and pioneers for the society. Some of the mother's role toward kids is to give them care, love, respect, lead, instruct and to try to form a safe and pleasant environment at their homes. Are these attitudes of the mothers toward their kids related to what the role of the teacher should be with the students in the classroom? If not, what should be the role of the teachers then?

A teacher is someone who becomes through many years of training and experiences in the field. A teacher who gets prepared will know how to set up rules in the classroom. Those kinds of teachers will probably have less problems in their classroom because they will be able to control the classroom.

A teacher carries a big responsibility in her classroom. One reason is that all students depend on her/him. Everything the teacher says will have an impact on the students. If the teacher feels joy or feels anger, it will be spread among children because the attitudes of the teacher get contagious. If the teacher laughs, students also laugh, why? Because teachers are responsible for the social behavior in the classroom. If something goes wrong the only responsible is the teacher even if it was not their fault.

The teacher must create a warm and protective environment but at the same time professional. If students feel secure in the classroom the result will be shown in the academic progress. A good start could be a mutual trust with each student. Teachers have the responsibility to know his/her student in the classroom. Each day, the teachers show one of their attitudes that the students are unaware of. Also, the students do the same in order for the teacher to get to know them, too. This is a good exercise to do because it benefits the whole class to break the ice.

A teacher should also have fun with the students. Kids learn faster when they feel attracted to an exciting lesson. Teachers must not forget that kids get bored fast that is why creative lessons must be planned ahead. A teacher should also be someone who guides student rather than someone who is a totalitarian in the classroom. The teacher needs to show respect toward the students so the students also respect the teacher. Teacher must not forget that they teach to

different students who brings different students who brings different traditions and customs because the students come from different backgrounds.
